Comment Of The Day

THE BRIDGE

BY the end of next year—perhaps even before then—Hongkong will know whether it is to have a harbour bridge. Certainly the weekend announcements by Government and Hongkong Realty suggest that there is a good chance it will be approved, providing the results of the survey do not turn up too many unforeseen difficulties, assuming the inevitable snags are surmountable and if finance can be arranged. These are three big ifs, but the confidence with which the Wheelock-Murden group have always discussed this proposal, coupled with the eight lakhs they are prepared to spend on the preliminary surveys, indicate that they are in no doubt about it becoming a reality.

GOVERNMENT'S states that it is now nibbling at the idea with interest where before it was coolly aloof. It is now committed to repaying Hongkong Realty part of the cost of the survey, conditionally of course. Also it now discusses the possibility that even Government might build the bridge whereas its previous attitude was that the bridge "did not appear to warrant the expenditure of public resources on any large scale either at the present time or in the foreseeable future."

For Government to repeat this statement on Saturday borders on contradiction in the light of the conditional undertaking it has now made to the Realty Company. The plain fact is that Government cannot be disinterested in a project of this kind. If it refuses to spend a cent on the bridge itself, it still must be vitally concerned in the consequences for traffic, the provision of parking facilities, the improvement and widening of access roads and the main city highways. And besides a decision to build a bridge will have a decisive bearing on the entire future development of the Colony.

GOVERNMENT still retains the right to refuse a bridge even if it is technically feasible. We urge one thing: a prompt decision. Government is going ahead with a second vehicular ferry scheme which will not of course be affected by any bridge announcement, since it is planned to come into operation by the beginning of 1961. But the thought of competition of this kind must fill tenderers for a second ferry with some reluctance. A promise of compensation should the bridge transpire is therefore needed. It is bad enough having to wait until 1961 for a second vehicular service without having the tenderers develop cold feet. The China Mail was, it will be recalled, the first to revive this idea of cross-harbour communications publicly in a "Comment of the day" almost five years ago. We discussed at some length a bridge and a tunnel scheme. Since then Mr. Ken Watson has brought to light a novel project for linking island and mainland with a causeway along the line of the old harbour defence boom. Our attitude today is the same as it was then: it is immaterial what we get so long as it is the best. Ahead of us is the year of decision. If the bridge proves best and there are no insuperable problems either technically or financially—then let's get on with it quickly.

25 Die In Weekend Fires

Firemen Killed By Explosion

OAG Visits Factory

New York, Aug. 23. Twenty-five persons were killed and scores injured in three separate fires which broke out today. Two of the blazes were in the United States and the other in South America.

One of the fires which occurred in the Toms River county prison, New Jersey, was followed by an explosion which killed eight.

In Pampa, Texas, a fire swept through an apartment killing five members of a family.

At least 12 firemen were crushed to death in a cave-in following an explosion in an eight-storied building in Rio de Janeiro.

OAG Visits Factory

HK, K'LOON BURGLARIES

—\$10,000 STOLEN

By A CHINA MAIL REPORTER

Cash and valuables to the total value of \$10,000 were stolen in Hongkong and Kowloon yesterday.

Thieves broke into the third floor of No. 15 K'n Wah Street, North Point, and stole a sum of money and a quantity of gold ornaments to a total of \$6,000 between 11 a.m. and 2.30 p.m. yesterday.

The owners who were away on a day's outing found the loss on their return.

Found missing was \$2,000 in Hongkong notes, US\$450, a brooch worth \$50, a gold necklace valued at \$100, six gold rings worth \$230, a golden cross, and other small items.

French Couple

In another case, US\$562 was stolen from the 13th floor of 23 Chatham Road between 10 a.m. and 6 p.m. yesterday.

The scene was the home of a French couple who had gone to the Philippines on vacation.

The man and his wife had left the premises at 10 a.m. On their return at 6 p.m., they found the man's drawer had been forced open and a package containing US\$562 was missing.

Temperature Drops With More Rain

Heavy downpours this morning produced almost an inch and a half of rain.

And the forecast is possibly another 24 hours of rain. The rain brought lower temperatures to the Colony. Yesterday's high was 2 of a degree short of the 80 mark. Today at 10 a.m. it had dropped to 76.5.

Overnight consumption of water however resulted in reservoir levels generally being lower than yesterday.

Yesterday's storage figure was 10,391 million gallons. At 8 a.m. today it was 17 million gallons less at 10,374 million.

Tai Lam Chung reservoir is reported to be the only one below full capacity.

Rain in Hongkong was not directly caused by typhoon Iris, but by a trough of low pressure along the south coast of China.

Landlord Takes Action Against District Chamber Of Commerce

A landlord in Victoria District Court today started proceedings to evict the Shaukiwan Chamber of Commerce from its premises.

Chan Tin-chu, of 10 Kam Wah Street, first floor, claimed that the building at 6 Kam Wah Street was exempt from the Landlord and Tenant Ordinance. The Shaukiwan Chamber of Commerce's offices, on the second floor of the building.

Mr. Patrick Yu, for Chan, said the building should be exempt because:

It was an entirely new building; and

It was built under a permit issued on April 30, 1946.

He said the case was the first of a series of actions which would come before the District Court.

GAOL FOR BOGUS LAND SALE MAN

A 31-year-old man who obtained \$7,800 worth of goods and cash by pretending to sell his "grandfather's land" to another man, was sentenced to 11 months' gaol by Mr. P. F. X. Leonard at Kowloon Magistrate's court this morning.

Tang Yuk-on, of hut 42, Sai Lan Kok Village, Tsun Wan, also pleaded guilty to three counts of uttering forged documents and three counts of forgery.

He was sentenced to six months' on each charge, but the sentences are to be served concurrently.

Detective Inspector W. H. Groome, prosecuting, said Tang told Tsui Lum-sang, a building contractor, that he was taking civil action to get his grandfather's land.

No English

"Tsoi knows very little Chinese and no English," Inspector Groome said.

"So when Tang handed him various documents purporting to come from the District Office and bearing the office chops, he did not know they were forged."

Two contracts were drawn up and Tang received certain sums of money and goods to the value of \$7,800 from Tsui.

Time passed and nothing happened so Tsui went to the District Office and produced the documents. There he was told they were forged.

False Trails

In the statement he made, Tang said he got the forgeries from a man called George Lo who works in the District Office.

"There was a George Lo in the office," Inspector Groome said, "but he was not concerned in Tang's affairs."

"Then Tang offered to point out the person from whom he had got the forged documents," he continued, "and took us to Shumshup where in a cafe he pointed out a man called Lo Yung-fai."

The man was arrested but later released when he was found to know nothing of the case.

Pleasure Boat Missing

Holyhead, Aug. 24. A small pleasure boat with about twelve people on board is reported missing in the Irish Sea after setting out from Holyhead on an "hour cruise."

The boat was hired by a group of tourists on Sunday afternoon and then disappeared. The Holyhead Lifeguard put to sea to search for the missing craft and all ships in the area have been asked to keep a look-out.—AFP.

REBUILDING

Mr. Yu said plans for rebuilding the house were submitted in 1947, and the new building was completed in 1948.

"Part of the old foundations were used, but otherwise everything was new," said Mr. Yu.

He submitted that it did not matter how much of the old building was incorporated into the new one.

Chan Tin-chu, told the court he had bought the site at 2-18 Kam Wah Street in October 1947.

Some of the buildings had been bombed.

When he first inspected them he saw people taking away stones from the wall.

Cross-examined by Mr. Brock Bernacchi, for the Chamber of Commerce, Chan said he believed the people were looting the premises.

He disagreed with Mr. Bernacchi's suggestion that there was no looting in Hongkong after October or November 1945.

Chan denied that the walls of No. 6 were still intact when he inspected them, and that all the people were taking was wood.

Mr. Bernacchi is assisted by Mr. A. H. Sullivan.

Hearing is continuing.

BULL STAMPED ON HIS FOOT

Madrid, Aug. 24. Antonio Ordonez, 27-year-old brother-in-law and rival of Spain's top matador, Luis Miguel Dominguez, joined the ranks of the country's convalescing matadors yesterday when a bull stamped on his foot.

Doctors at San Sebastian ordered him to stay out of the ring for six to 10 days after diagnosing a sprained ankle. The accident occurred at Dax, France.—Reuter.

NEW FUEL?

Berlin, Aug. 23. East German university students were told the real reason the Soviet's moon rocket penetrated farther into space than American moon rockets.

"The philosophy of the working class dialectic materialism, formed an important part of the fuel of the Sputniks of the moon rocket," mathematician Dr. Klaus Swelling wrote in a Communist weekly newspaper.—UPI.

EXPOSED

Milan, Italy. A beggar posing as a deaf mule was arrested when he became involved in a dispute with a streetcar conductor and started yelling.

Police In Clash With Africans

TWO SHOT

Capetown, Aug. 23. Two African policemen were shot today when a police patrol car was attacked by an angry crowd of Africans at Nyanga West, near Capetown.

The policemen were taken to hospital with arm and leg wounds. The reason for the attack was not immediately known.

The patrol car was stoned and stopped and three African policemen, led by a European constable, got out. The crowd grew in size and gunshots were fired from it.

Two Africans were arrested.

ROCKEFELLER HONEYMOON DELAYED

Copenhagen, Aug. 24. Steven Rockefeller and his pretty Norwegian bride, Anne Marie, had their honeymoon trip to the United States delayed for three hours, from here.

The big Scandinavian liner in which they are travelling from Europe to New York, after flying here from Norway last night, was held back for repairs when smoke was smelt in the cabin as the aircraft was on the runway.

Steven and Anne Marie, together with Governor and Mrs. Nelson Rockefeller, just sat it out behind drawn curtains in the rear seats of the aircraft, while mechanics repaired a fuse in the electronics system.

The airliner took off 30 minutes later.—Reuter.

Mail For Israel Seized

Port Said, Aug. 23. Customs authorities today confiscated eight mail parcels from Australia destined for Israel.

The Norwegian vessel Tarn unloaded the parcels here for replacement when it changed its course from Genoa to Marsella.

The parcels weighed approximately 180 lbs.—UPI.

Attempted Mass Prison Break In Cyprus Fails

Nicosia, Aug. 23. Four prisoners were injured today in an attempted mass prison break.

The four were injured as they jumped down from a 15-foot wall in Nicosia's Central Prison. They were captured. Two hundred prisoners in all took part in the unsuccessful break. The attempted break began when the prisoners set fire to their furniture and then staged an all-out riot.

Police used tear gas to disperse the rioters and called in British Military police to help quell the prison break attempt.

An official statement said that the break appeared to have been organised.

The mass escape attempt took place while prison officers were talking to a delegation of prisoners' representatives about their complaints against prison food.

SCALED WALLS

The prisoners built a platform of chairs and tables in an attempt to scale the walls, which were covered at the top by broken glass.

Only four of them made it, at the expense of sprained ankles and cuts, but they were immediately taken into custody by police.

Grivas Supporter

Nicosia, Aug. 23. A Greek Cypriot bishop, supporter of the idea of Cyprus union with Greece, expressed the hope today that former underground leader Gen. George Grivas would become prime minister of Greece soon.—UPI.

Sacrificed Their Children

New Delhi, Aug. 23. A village officer, his wife and six children have been sentenced to death for sacrificing three children before the Goddess of Wealth, reports from Vizagapatnam said today.

The reports said the wife wanted to please the goddess to ensure her own bright future, and in collaboration with the rest of the family killed the three children and later threw them into a well.—UPI.

DID THE PANCHEN LAMA REBEL?

Mussoorie, Aug. 23. The Dalai Lama said here today in a special interview that there was every possibility the Panchen Lama had been arrested by Chinese authorities in Tibet.

He said the Panchen Lama was, after all, a Lama, and that his feelings about his religion, race, and country could be strong. The Dalai Lama said the Chinese had used the Panchen Lama as long as they wanted him and might now consider him unsuitable for their plans to change Tibet, religiously and economically. He said it was characteristic of them not to be grateful to anyone for any good act.

The Dalai Lama added that the Panchen Lama's father was a strong-willed man whose patriotic feelings for the Tibetan nation were well-known. The Chinese had evidently subjected him to torture and humiliation, which might in turn have caused the Panchen Lama to rebel, the Dalai Lama said.—AFP.

600,000 Year-Old Human Fossils Found

Leopoldville, Aug. 23. Dr. Louis Leakey, one of the world's leading anthropologists, claims his wife had found human fossils about 600,000 years old in Tanganyika which may be the earliest known trace of man.

Reputed to be the world's greatest living expert on East African anthropology, Dr. Leakey has searched for many years to prove his belief that man originated in Africa.

Now curator of the Crocodon Museum of Natural History in Nairobi, Kenya, he told the Pan-African Congress of pre-history here yesterday that

his wife found the human fossils among animal remains in the Olduvai Gorge in Tanganyika on July 17.

Crude tools were also found which suggested some form of human culture, he said. A reconstruction of the bones showed a skull which was estimated to date from the second half of the Pleistocene era 600,000 years ago.

(By comparison, the Peking Man, one of the most famous of prehistoric races, was estimated to have lived 500,000 years ago.)

Dr. Leakey and his wife have been searching in the Olduvai Gorge on and off for many years and have already found

there the fossil remains of extinct giant pigs, sheep and oxen. The sheep were as large as the modern African buffaloes and the pigs as big as rhinoceroses.

His explorations in East Africa have added considerably to the world's knowledge of the origin of the human species. His most important discovery, which created an international sensation, was in 1948 when he and his wife, who is also an archaeologist, found the skull of Proconsul estimated to be 25 to 30 million years old. This ape creature had anatomical features more human than any living ape.—Reuter.

Originator

Sheriff Harry Roe said "everything points" to an occupant of a padded cell as the originator of the fire. The man had been transferred here yesterday after wrecking a cell at the Municipal Gaol in nearby Lakewood.

Roe said the foam rubber in the padded cell acted as fuel for the fire and turned a minor incident into a tragedy. He retraced an earlier statement that an explosion followed the fire.

"If there hadn't been spontaneous combustion, this thing would never have happened," he said.

The blaze forced County officials to transfer most of the remaining 57 prisoners to other jails in the state. Others with minor offences or only a few days left to serve were released.

The County prosecutor's office, the State Department of Institutions and Agencies and the local police are now conducting immediate on-the-spot investigations of the fire.

Converted

In the fire that swept an apartment in Pampa, Texas, killing five, seventeen others were spared escaped from the burning building which had been converted from a hospital into an apartment seven years ago.

The five victims were Mr. and Mrs. Louis Stone and three of their children. "The Stone children escaped—two by jumping from a top-story window and the third by a fire escape. Two are in the hospital with minor injuries.

The five victims died because they apparently tried to put on their clothes after being awakened by the landlady. Firemen found the bodies in various stages of dress.

Chemical-Fed

In Rio de Janeiro, a dozen firemen battling a chemical-fed fire here today were killed in a cave-in which caused heavy casualties.

Fifty persons, including 29 firemen, were injured by the blaze. Many of the injured were in serious condition.

The fire started in an ink and plastics warehouse and quickly spread to two adjoining buildings, as well as several residential apartments.

Twelve firemen rushed into the eight-story building next to the warehouse and were fighting the blaze when a tremendous explosion buckled the walls and sent the roof crashing down on them.

Pre-Dawn

The fire started in pre-dawn darkness and every available fire unit had to be summoned to the scene to cope with the roaring flames. It took seven hours to bring the fire under control.

Damage was estimated in the millions. All that was left of the warehouse and the two adjoining buildings was charred rubble.—UPI.

Death Penalty Is Legalised Murder, Brazil Is Told

CONTROVERSY RAGES

Sao Paulo, Brazil, Aug. 23. Anna M. Kross, Commissioner of New York City's Department of Correction, said today that the threat of capital punishment was no deterrent to murder.

Kenya Africans Divide Into 2 Parties

Nairobi, Aug. 23. The 14 African elected members of Kenya's Legislative Council have split into two groups following a weekend of meetings of the colony's African politicians here.

Eight members are now confirmed supporters of the Kenya National Party formed last month to achieve a democratic Kenya in which every citizen would have equal rights regardless of race, colour or creed.

Six others, including Mr Tom Mboya, General Secretary of the Kenya Federation of Labour and President of the Nairobi people's convention party, are forming a new party, the Kenya Independent Movement.

In a policy statement on August 7 for the London talks next year on Kenya's constitutional future, the Mboya group called for a date to be set for independence, a common electoral roll, which would give the Africans the majority vote; immediate integration of the now exclusively White Highlands north of Nairobi; a ban on further immigration of European farmers and an end to segregated schooling.

Flees E. Germany With 14 Cows

Eschwege, West Germany, Aug. 23. A 55-year-old farmer from Volkerode, East Germany, drove a herd of 14 cows across the zonal border into West Germany today. He was accompanied by his wife and two daughters, aged five and 10.

According to the West German news agency DPA, the farmer left his property because it was about to be taken over by a state production organisation.

Oil Pipeline

Moscow, Aug. 23. Plans for a 2,500-mile underground oil pipeline from the Soviet Union to Poland, Eastern Germany, Czechoslovakia and Hungary, have been completed, the Soviet news agency Tass said today.

Last Civil War Man Nears 117

Houston, Texas, Aug. 23. Walter Williams, the last of the men who fought in the American Civil War, may live to see his 117th birthday, his doctor said today.

Dr Russell Wolfe said the old Confederate veteran was showing signs of improvement. Williams will be 117 on November 14. Already this year he has beaten an attack of pneumonia, and is now battling a siege of constipation.

"He's getting so you can arouse him," Dr Wolfe said, "and he is demanding things. That's a good sign."

Williams, who has 19 children, became the sole survivor of the Civil War last March when John Ballin, 112, died in Kingsport, Tennessee. The last Union soldier, Albert Woolson of Duluth, Minnesota, died two years ago.

'Roman' Anglican Priest Dismissed

London, Aug. 23. Dr Marvyn Stockwood, Bishop of Southwark, has dismissed an elderly priest in his diocese because he alleges the priest practised a "Roman rite" instead of the Church of England's services.

Dr Stockwood, known as the "Bow-Tie" bishop, said today he told the priest: "You have done a terrible damage to the peace and welfare of the church whose servant you are."

Would-be worshippers arriving at the priest's church, St Andrew's Mission Church, Carshalton, Surrey, this morning found they were unable to enter. The reverend arrived as usual to open the church for morning service but found that his keys no longer fitted the lock. The lock was changed yesterday.

Dr Stockwood today read his letter dismissing the Rev. Rice Alford Evelyn Harris, 72, to parishioners of Carshalton, where Mr Harris has been curate of the mission since 1927. The reason the bishop gave for dismissing him was that he followed the "Roman" rite instead of the Church of England's services. He revealed that Mr Harris resigned after an interview with him and that he later asked to withdraw his resignation. Dr Stockwood said he refused.

China Power Line

Paris, Aug. 23. Radio Peking reported the first high tension power transmission line is being rushed across the Yangtze river in the triple city of Wuhan. Wuhan is composed of Wuchang, Hankow and Hanyang.

One of the two giant towers to string out the line has been completed at Hanyang on the north bank of the river. The towers will soar 146.75 metres high, as high as a 40-storey building.

Flat Answers

Now Delhi, India, Jan. 2. Officials said questionnaires from applicants for policemen's jobs included the following identifications:

Florence Nightingale, founder of the boy scout movement.
Napoleon, leader of Italy.
Burma: a part of India.

Shipyard Work In UK Stirs Inquiry

London, Aug. 23. Mr Iain Macleod, Minister of Labour, has been told by leaders of the 800,000-strong National Union of General and Municipal Workers that they would welcome a court of inquiry into "who does what?" disputes between rival unions in Britain's shipbuilding industry.

This is the first of 40 unions in the Confederation of Shipbuilding and Engineering Unions to respond to the Minister's suggestion that there should be an independent investigation into demarcation disputes.

The idea of an investigation was originated by Mr Ted Hill, General Secretary of the Boilermakers' Society, who asked for an inquiry into troubles at the Cammell Laird Shipyard, Birkenhead, where a recent dispute between boilermakers and shipwrights rendered 1,500 N.U.G.M.W. members idle.

Mr Macleod felt the scope of any inquiry should be widened to cover demarcation disputes in the entire shipbuilding industry.

85 ILL FROM FOOD POISONING

Attica, Indiana, Aug. 23. Officials said today an improperly cured ham served to 1,200 persons at a company outing apparently caused Indiana's second mass food poisoning case within a week.

Eighty-five persons were stricken with violent stomach cramps late Saturday night at a picnic grounds near this small, central Indiana town.

All but 14 were released after treatment in hospitals at Williamsport and Lafayette.

Invited To Turkey

Istanbul, Aug. 23. Mr and Mrs Anthony Bailey the British couple who helped Mr Adnan Menderes, the Turkish Premier after an air crash by their farm near Galtwick last February were presented with a number of bouquets when they arrived here by air last night.

They were invited to spend a three-week holiday in Turkey by the Istanbul Municipal Council. They have with them their two children Elizabeth aged seven and Nicholas nine.

Hobby Proposed

London, Aug. 23. A British psychologist has suggested that businessmen take up knitting on their way to work to reduce nervous tension.

"It is a great pity that men have no knitting to occupy them on train journeys or at other idle moments," Dr F.E.C. Casson said in the magazine Family Doctor. "They are left with no resources but to smoke, study the racing news or do crossword."

London, Aug. 23. The Longmans Publishing Company printed this notation next to the book "Contraband Cargoes" on its spring listing: "Of Special Appeal to Smugglers."

U.S. Restricting Polaris - Firing

Subs To 40 PLAN OUTLINED FOR NAVY OF FUTURE

Minneapolis, Aug. 23.

The United States Navy plans to restrict its Polaris missile-firing submarine fleet to about 40 vessels, Vice-Admiral Wallace Beakley said today.

The Admiral, Deputy Chief of Naval Operations for Fleet Operations and Readiness, made this disclosure in a speech prepared for delivery to an American Legion convention here.

Admiral Beakley emphasised the striking power of a fleet of 40 nuclear submarines armed with hydrogen-tipped ballistic missiles.

"Constantly roving, hidden in the vast depths of the ocean,

they will be available at any time they are needed to send several hundred Polaris missiles towards targets within minutes," he said.

Diversified

Admiral Beakley said the navy wanted to keep the number small because the "deterrent - retaliatory" strength must be diversified, because when weapons were so safe against counter-attack, their number did not need to be large and because the navy's requirements to meet "limited aggression" would be exceedingly heavy. The navy has nine nuclear Polaris-firing submarines either under construction or on the drawing board at present. The range of the Polaris which is still under development, will be about 1,200 miles.

Vast Array

The Admiral told the commission about the vast array of new missiles, carrier-based planes and both conventional and nuclear-powered ships envisaged for the navy of the future.

He foresaw at least one complete all nuclear-powered task force of aircraft carriers, cruisers, frigates and destroyers, all carrying a deadly guided missile.

In unveiling the Navy's plans, Adm. Beakley said the Communist threat will continue through the "lives of generations to come."—Reuter and UPI.

ANOTHER EARTHQUAKE AT YELLOWSTONE

Yellowstone, Aug. 23. A further violent quake has occasioned a new landslide above Hecben Dam, already seriously damaged by last week's earthquake series.

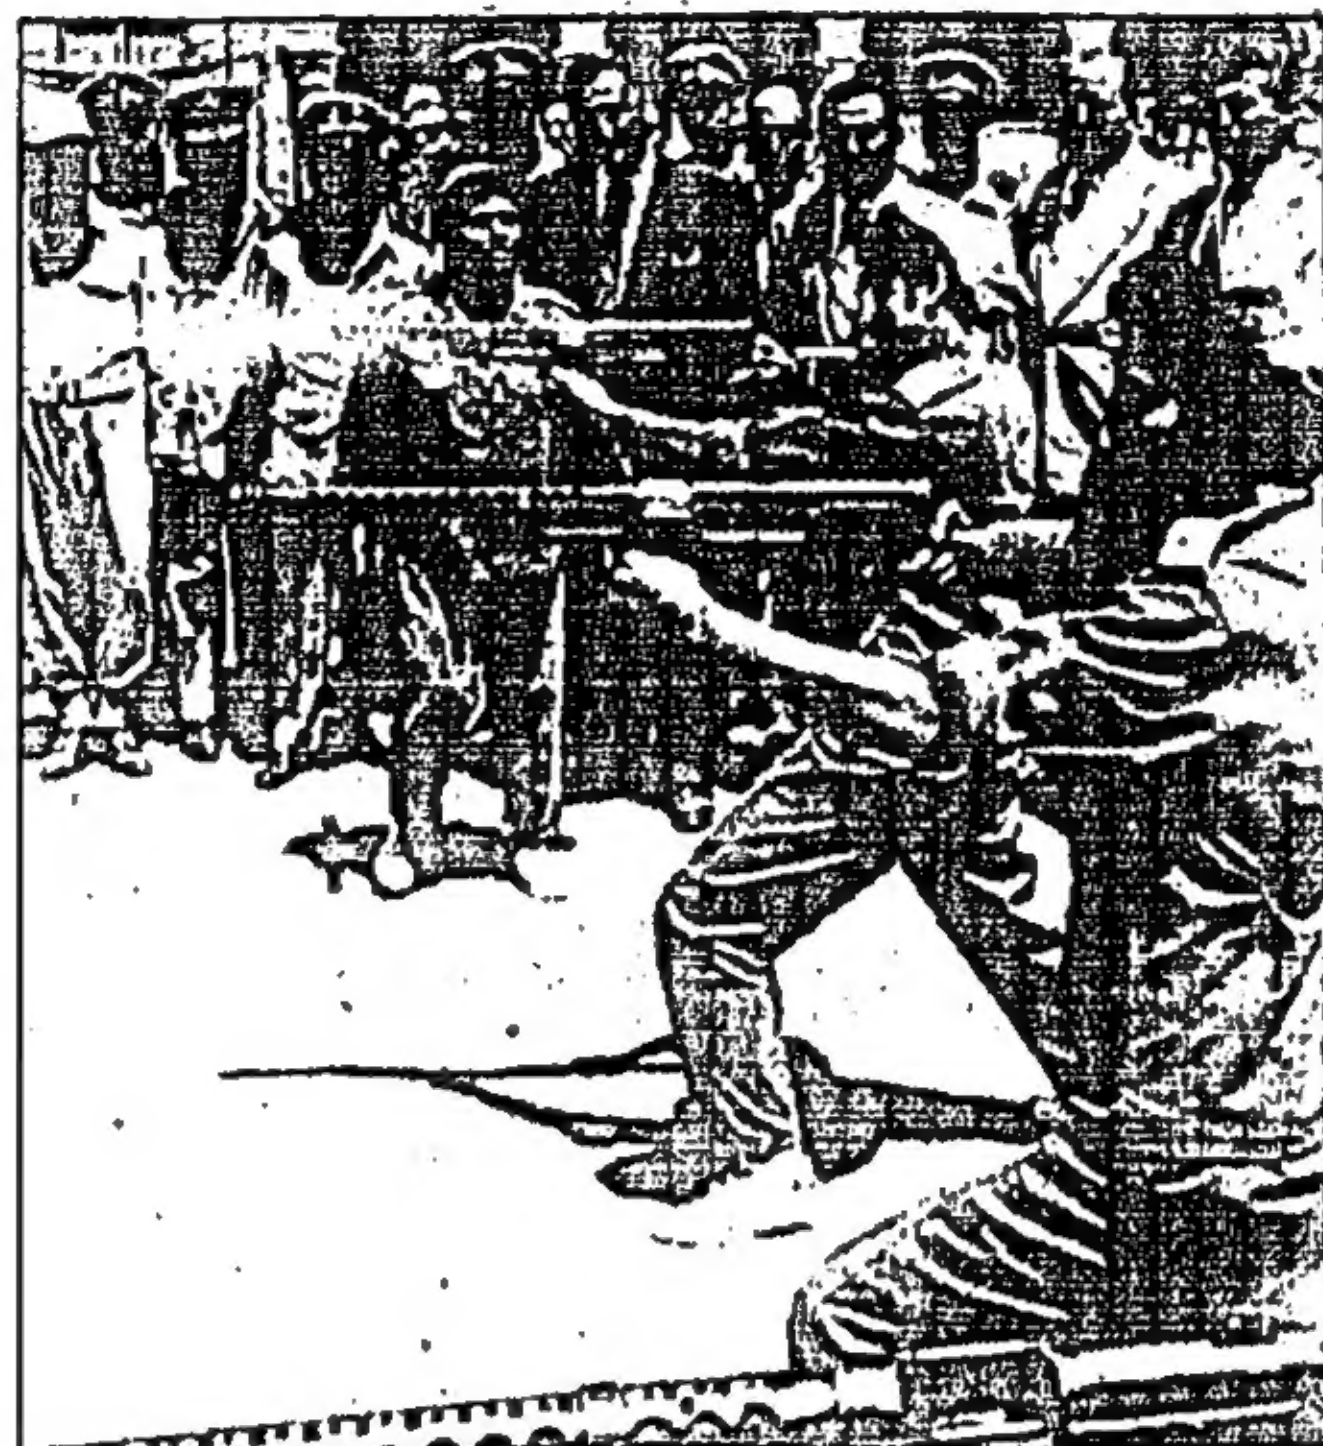

The quake occurred around 0130 local time and was felt throughout Yellowstone National Park region.

A road leading to a cluster of a score of summer cottages near Hecben Dam was cut,

but the cottages were empty since last week.

There was still no news of a large number of tourists who had told relatives they would be in the vicinity of Yellowstone Park, early last week, at the time when the first shocks were going on for 10 people besides nine victims and two other persons presumed to be missing last week.—AFP.

TEACHERS IN ARMS

Egypt's women teachers are all spending part of this summer's holidays learning how to use military equipment. Here a group of them practice with automatic rifles under the avuncular eye of President Nasser, who told them that one day they may be called upon "to play an important part in the decisive struggle against Israel."—Express Photo.

THE BARD GAVE RICHARD III A BAD PRESS

Belfast, Aug. 22.

AN Irishman today inserted an "In Memoriam" notice in the advertisement columns for the Belfast Telegraph to commemorate the death of King Richard III of England.

It read: "Plantagenet" August 22, 1485, at Bosworth Field, Richard Plantagenet, youngest son of Richard, Duke of York, Most Gracious Prince, England's worthy King.

Richard III, slain at Bosworth in a battle which marked the end of the Wars of the Roses, imprisoned his young nephew, the boy King Edward V and his brother—in the Tower of London, where they later disappeared—murdered, it has been alleged, by their uncle.

In recent years several writers have sought to clear the name of Richard.

The man who inserted today's memorandum notice, 50-year-old Belfast insurance clerk Thomas J. Healy, told the clerk at the newspaper's advertisement counter: "I am not mad—I just think His Late Majesty deserves the tribute."

Mr Healy believes Richard was not such a bad fellow after all.

He said: "The history books don't tell everything and Shakespeare didn't help matters either."

King Richard, Mr Healy maintains, owes the sneers on his character to the play Shakespeare wrote about him.

"Shakespeare has given Richard a bad press in the past and I want to make up for it now," he said.—China Mail Special.

CHINA'S POPULATION:

Increasing By 12m Every Year

Washington, Aug. 28. The Population Reference Bureau said today in its annual report that the people of China are increasing at the rate of 12,000,000 a year and those of India at the rate of 5,000,000 a year.

"Latin America's population may nearly quadruple before the end of this century," it said. UPI.

Threw Savings Into River

Paris, Aug. 22. A 71-year-old woman, resident of an old age institution in Nemours, near Paris, today threw her whole life's savings out of a first floor window into the river Seine, which flows past the institution.

A treasure-hunting party was immediately organised. Most of the money, in 10,000 francs notes, was retrieved. They totalled 321,000 francs out of an undisclosed sum.—UPI.

SCOTS GUARDS ADMIT THEY NEED A PRO

London, Aug. 23.

The crusty colonels of Queen Victoria's reign are probably turning in their graves this weekend.

Princess Alexandra Went Missing

Brisbane, Aug. 23. Princess Alexandra of Kent and her Lady-in-Waiting, Lady Moyra Hamilton, this afternoon "went missing" for more than two hours on a Queensland cattle station near Warwick.

After an informal lunch at the Risdon Stud station where the Princess in spending a quiet weekend, she and Lady Moyra walked down to the stables, where the two young sons of Mr Howard Douglas, owner of the station, were lending a horse.

Four officials at the station were surprised when the Princess and Lady Moyra did not return. They later found the two boys, 12-year-old Roger and Ross, aged nine, had saddled horses for the visitors and the four had set out on a tour of the property.

They returned late in the afternoon, the Princess with her face flushed from the southerly breeze blowing across the Downs country.

DIVINE SERVICE

Earlier today, the Princess attended Divine Service at St Mark's Church, Warwick, and on the return drive to Risdon stopped several times to acknowledge waves and cheers and receive impromptu presentations of bouquets.

The Princess drove to Risdon last night after attending a race meeting at Brisbane's Eagle Farm racetrack, and tomorrow she leaves by car for Toowoomba on the first leg of a 2,000-mile tour of Queensland. Tonight the Princess was spending a quiet evening in her room at Risdon writing letters.—Reuter.

Convicts Recaptured

New York, Aug. 23. Three escaped convicts held a clergyman hostage in his home at Fort Madison, Iowa, today but surrendered without a struggle when police surrounded it.

Altogether six men broke out of the State prison here. They were described as "extremely dangerous" and were armed with knives. After the capture at the home of the minister, the other three men, shirtless and wielding knives, were sighted in an unoccupied house near the prison and police converged on it, officials said.—Reuter.

No Intervention Called For

Venice, Calif., Aug. 23. Albert A. Tammer, 31, learned the hard way yesterday that when women are involved, it's sometimes the better part of valour not to try to break up a fight.

Tammer, a dishwasher, told police that when he tried to act as a peacemaker, two semi-conscious women beat him into submission and took his cigarette lighter and his wallet containing \$5.—UPI.

CO's Car Stolen

Fort Jackson, SC., Aug. 23. The 1st Infantry Regiment motor pool at this army post reported with some embarrassment yesterday that someone had stolen the commanding officer's sedan during the night.—UPI.

And it is a fair bet that some of the more unbending of Britain's military traditionalists are wondering what things are coming to.

The reason for this consternation among the stiff-upper-lip school? The announcement this week that the Scots Guards, one of Britain's famed guards regiments with battle honours going back to the 17th century, are to appoint a public relations officer.

His job will be to help boost recruiting. In the words of the 28-year-old Assistant Adjutant of the Regiment, Lord Napier, he will project the right image of the Scots Guards into the public mind.

Brochure

And, as a start on this, a firm of publicity agents has prepared a brochure entitled "Are you good enough for the Scots Guards?"

This seems likely to further enrage the sticklers for tradition, to whom the idea of one of Britain's crack regiments relying on anything other than its reputation and history to attract recruits is distasteful.

For, traditionally, no task is beyond the capacity of the Scots Guards— who incidentally, do not come exclusively from Scotland but are recruited from all parts of the British Isles.

Their motto is Nemo Me Impune Lacessit—which can be roughly translated as "No humiliate me and gets away with it."

Achievements

Among their achievements can be numbered such diverse tasks as playing a major part in the final defeat of Napoleon at Waterloo, storming the Anzio beachhead in the last war—and sending their 80-strong band to carry out a triumphant goodwill tour of the United States and Canada last October.

In recent years the Scots Guards have been partly based in Germany, their 1st Battalion has been serving there since November 1958. The previous year the 2nd Battalion returned to the United Kingdom from Germany after a four-year tour of duty.

The Scots Guards were founded in 1600 at the time of the restoration of King Charles II. They are the third in seniority among the Guards regiments, following the Grenadier and the Coldstream Guards.

But, according to Lord Napier, there has been a falling-off in recruiting to the Scots Guards during the past year. It is not very serious—last October the Regiment announced that it had no further need of National Servicemen—but it is enough to cause some anxiety.

SIR THOMAS BEECHAM:

Marriage To Secretary No Snap Decision

London, Aug. 23.

Sir Thomas Beecham the 80-year-old British conductor said tonight that he made "no snap decision" to marry his 27-year-old former secretary Shirley Hudson, whom he wed secretly at Zurich on August 10.

He was speaking to reporters at London Airport before he and the new Lady Beecham parted company for a week.

He left for Geneva, while she flew on to the Edinburgh festival in her capacity as manager of the Royal Philharmonic Orchestra.

Sir Thomas said: "I have known Lady Beecham for nine years. I thought, about asking her to marry me, for a long time."

"It was no snap decision. I do not know yet whether we shall make a permanent home on the Continent."

"Sir Thomas will continue to return to Britain when he is required and I shall have to return periodically in connection with my work."

"Sir Thomas said that after rejoining me, another, they would then stay in the south of France.—Reuter.

12 Killed In Landslide

Tokyo, Aug. 24. Twelve persons were killed and four others are missing from a landslide triggered by torrential rains that hit southwest Honshu Saturday night and continued through Sunday morning.

Of the dead seven were residents of Matsuda and five others of Itanaka, another town in the area. Another Japan sea port, 25 miles northwest of Matsuda, they were crushed to death when landslides destroyed their houses.

Police reported the storm flooded many houses and some 60 acres of fields and paddies. The train service was also temporarily disrupted along the national railways. Banding line connecting this city.—UPI.

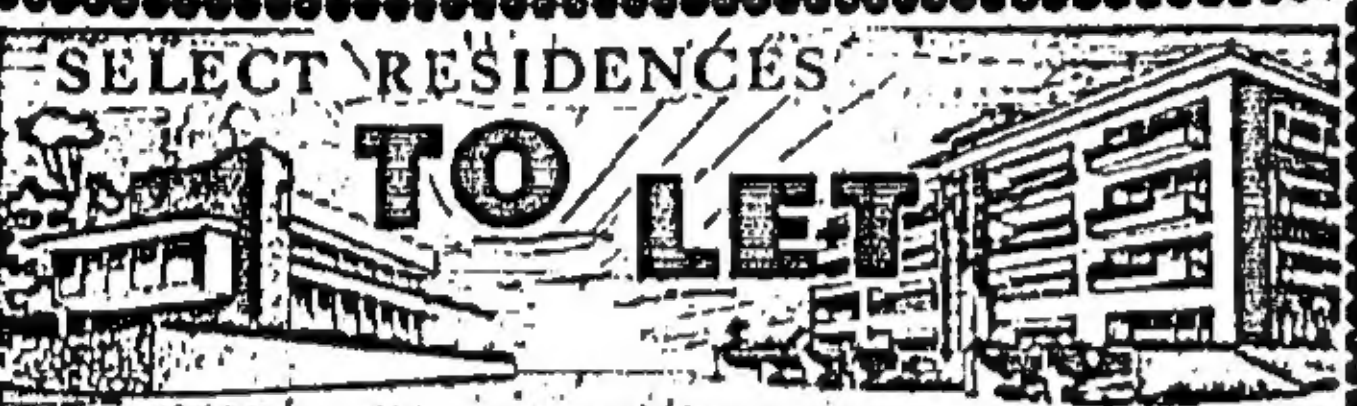

7 MENTAL PATIENTS CAPTURED

Lapeer, Mich., Aug. 23. Police today captured seven mental patients who escaped from the state home and training school last night during a riot involving about 50 inmates.

None of the fugitives resisted when picked up at various spots in the city, police said. Those involved in the riot were separated from the other inmates. The only injury during the disturbance was to a guard who was cut on the forehead.

Authorities said the riot began in a section of the institution where "tough" inmates are kept. No reason was given for the outbreak.

It took about 40 State troopers and attendants about an hour to quell the rioting.—UPI.

GARDEN ROAD (Adjacent to)
Two-bedroomed apartments (furnished and unfurnished) to let now in upper floor of modern well-appointed building. Several of these reasonably-priced premises overlook the Botanical Gardens and the Harbour.

Why We Debunk Britain

by
THE BOULTING BROTHERS

ROY (left) AND JOHN

Here they talk to JOHN CRUESEMANN:—

WE are the only geminal film twins in existence.

What is more, we are probably the most philoprogenitive film family alive. We could put a whole cricket eleven into the field—ages ranging from two to 17—and that's just where we like to put them when we're at work.

Fortunately, neither of our wives takes us seriously; they are always making fun of us.

And if we spend a lot of time debunking the world about us, our wives spend even more time debunking us, which is probably a good thing. Probably? Definitely!

We are 45. For 27 years we have been in the film business, and for 22 years we have been producing our own films.

When we started we made low-budget films with a high mind. They earned us wonderful notices, many letters from earnest film lovers, and the deep suspicion of the film industry.

Jack Dunfee, the theatrical impresario and agent, described us in these days as the Angry Boys. We were before our time. After the war we became a little tired of showing our tempers on the screen. It was at this time that Richard Attenborough found himself lunching a few tables away from Noel Coward. He was summoned to the Master's table.

"And what are you doing now, Dickie?"

"I've signed up with the Boulting Brothers."

Fun

"Ah! The Boultings!" Coward sighed. "Quite brilliant but absolutely humourless."

This gave us to think. Maybe he was right. And we began to wonder if it would be possible to be serious without being solemn. And so our comedy series began.

We make films to make people laugh, and because we enormously enjoy making them.

A secondary, but almost equally good, reason is a simple

one: as individuals we believe in Britain because Britain has always stood for the individual. Nowadays there seem to be two sacred cows—Big Business and Organised Labour. Both are deep in an open conspiracy against the individual—to force us to accept certain things for what in fact they are not. Both are busily feathering their own nests most of the time. And to hell with the rest of us.

which people with power regard the average man.

And we don't mean just the Jacks-in-office, but men who decide what we shall do, see, and hear.

Take Tin Pan Alley. For our new film, "I'm All Right, Jack," we had a rock 'n' roll tune composed. A film about the present day required music of the present day.

But the words that went with the music were considered too "intelligent" by Tin Pan Alley. They didn't want to know, so they insisted that nobody else would want to know.

Now the music goes out on disc with an original lyric all about hugging my baby, and etc. (You know the words.) That is typical. The people who know best frequently only know the worst.

Tradition

Happily, the average Briton isn't discomfited by being made aware of his country's absurdities. That is his great strength, his most precious tradition—that of laughing at his leaders and institutions.

We believe our films reflect the popular attitude and mood. Their success seems to prove our point.

Certainly we are never more serious than when we're being humorous, and although our intentions are serious, so far we've managed to avoid taking ourselves too seriously.

(London Express Service.)

NOW THEIR LATEST

The brilliant British film team known as the Boulting Brothers have poked fun at a number of stuffy English institutions in recent years and thousands all over the world have laughed at their films which have made tilts at the Army, the Civil Service, the legal profession and now, in their latest "I'm All Right, Jack," at big business and Organised Labour.

The film, to be released in Hongkong later this year, stars Terry-Thomas, Dickie Attenborough and many of the stars that have made other films by the Boulting Brothers famous.

Both seem to believe that they should be regarded as Holy Writ, whereas they have their full quota of original sin. So much humbug surrounds them that we decided here was something which ought to be bashed. So we made "I'm All Right, Jack."

After all, who is King in the Welfare State? That humourless, faceless monster—the official, the bureaucrat, the combine executive.

Certainly a great deal has changed since we used to be Angry Men before the war. Social disparities have largely been abolished, people are infinitely better off (except old age pensioners), we are told from on high that we have never had it so good. It must be true! But at the end of this huge revolution we are not so sure that the losses have not been as great as the gains.

For example, the tendency to think of people not as human beings but as part of a group, a bloc, a class. We deplore the ill-concealed contempt with

BACK COMES TERROR—BUT THIS TIME WITH A DIFFERENCE

Trouble in Cyprus— I'm not surprised!

THERE are clouds gathering over Cyprus again. Terrorism returns. A woman is burned to death. Arms are smuggled in. And propaganda leaflets are being distributed.

It is the second act of the same old tragedy. But now there is a touch of comedy about it.

Colonel Grivas couples Archbishop Makarios with the British as the arch enemies of Enosis—the movement for the union of Greece with Cyprus.

Was it for this that so many of our soldiers gave their lives?

And have we before us but the continuation of another useless struggle?

Questions

These are the questions raised by Lord Salisbury in a letter published in The Times. For Archbishop Makarios, backing away before the threats of Colonel Grivas, has declared that within the perimeter of the two British bases there will be no populated Cypriot areas.

Where then, Lord Salisbury asks, is the labour needed to run the bases coming from?

What is to stop it being withdrawn at a moment's notice?

And he concludes by stating that there remain two alternatives:

Either to ensure that there is a working population within the confines of the bases—or to go elsewhere.

To understand why Lord Salisbury's letter is so alarming, examine the events of the last year.

In September Greece, anxious for a deal with Turkey, was ready to give up Enosis and to allow Cyprus to become a member of the Commonwealth.

This opportunity the Government refused to believe existed. When I pressed the matter in the House of Commons I was treated as an agitator. And the Whips went around telling everybody that the idea was most dangerous and unhealthy.

Cummings

"If only I could get rid of this thing round my neck, maybe I'd be shaking hands with her Majesty."

London Express Service

BY LORD LAMBTON, M.P.

However, at last the Prime Minister, over-riding the objection of the Foreign and Colonial Secretaries, suddenly understood that a negotiated peace was possible and called the Turks and Greeks together for talks on the future of Cyprus.

Confused

Then a fatal error was made. We were not officially represented at the talks. The precedent was established of a British Prime Minister inviting two foreign countries to meet and decide the future of a British

colony without the British being a party to the talks.

The result was exactly what I prophesied. Greek and Turkish interests were put before our own.

A belated storm arose among Conservative right-wing members. So a sop was thrown to them: British sovereignty over the bases. But, of course, no mention was made as to who was going to work them.

Once again our policy was confused. Having decided on an excessively liberal policy, we suddenly added to it British

sovereignty over a part of Cyprus, a clause certain to be the rallying point of every anti-Government force there and in Greece. And so it has turned out. There is no chance that the new cry for Enosis and the abandonment of our bases will suit my cause.

For years Greek Governments would take their people's mind off poverty by complaining about Cyprus. Now the British bases are a perfect weapon for the Greek opposition of the Right and the Left.

The position is also complicated by the fact that the Turks agreed to the Cyprus settlement only on the understanding that we kept bases there.

It is, therefore, impossible for us to leave suddenly.

Furthermore, without the British bases the financial position of the island would be bad indeed—and a good portion of the population realises it.

Reduce base

What now? I suggest we should let it be known that if the situation in Cyprus worsens we are ready to reduce the base to self-sufficient size, large enough to guarantee our re-entry if serious Turkish-Greek trouble arose but not large enough to benefit the economy of the country or to make it a base for a foreign operation.

This might well have a salutary effect.

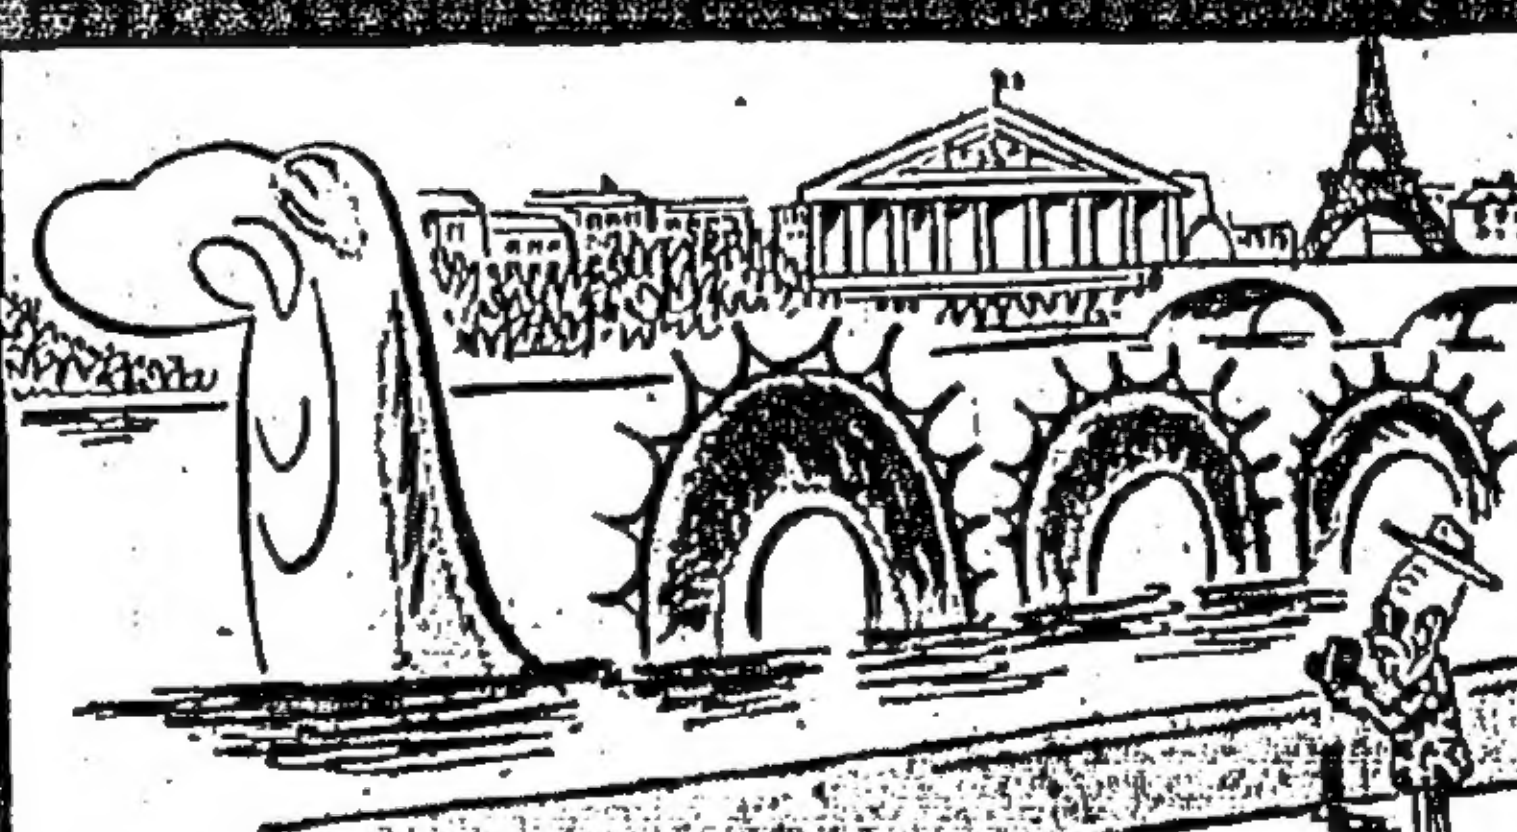

But the outlook is not good. You cannot be seven-eighths Liberal and then throw in a forced Imperial connection.

When the terms of the London agreement were debated I argued "a policy of pure strength can work, a policy of pure compromise can work, but in a situation such as this the mixture of the two cannot work."

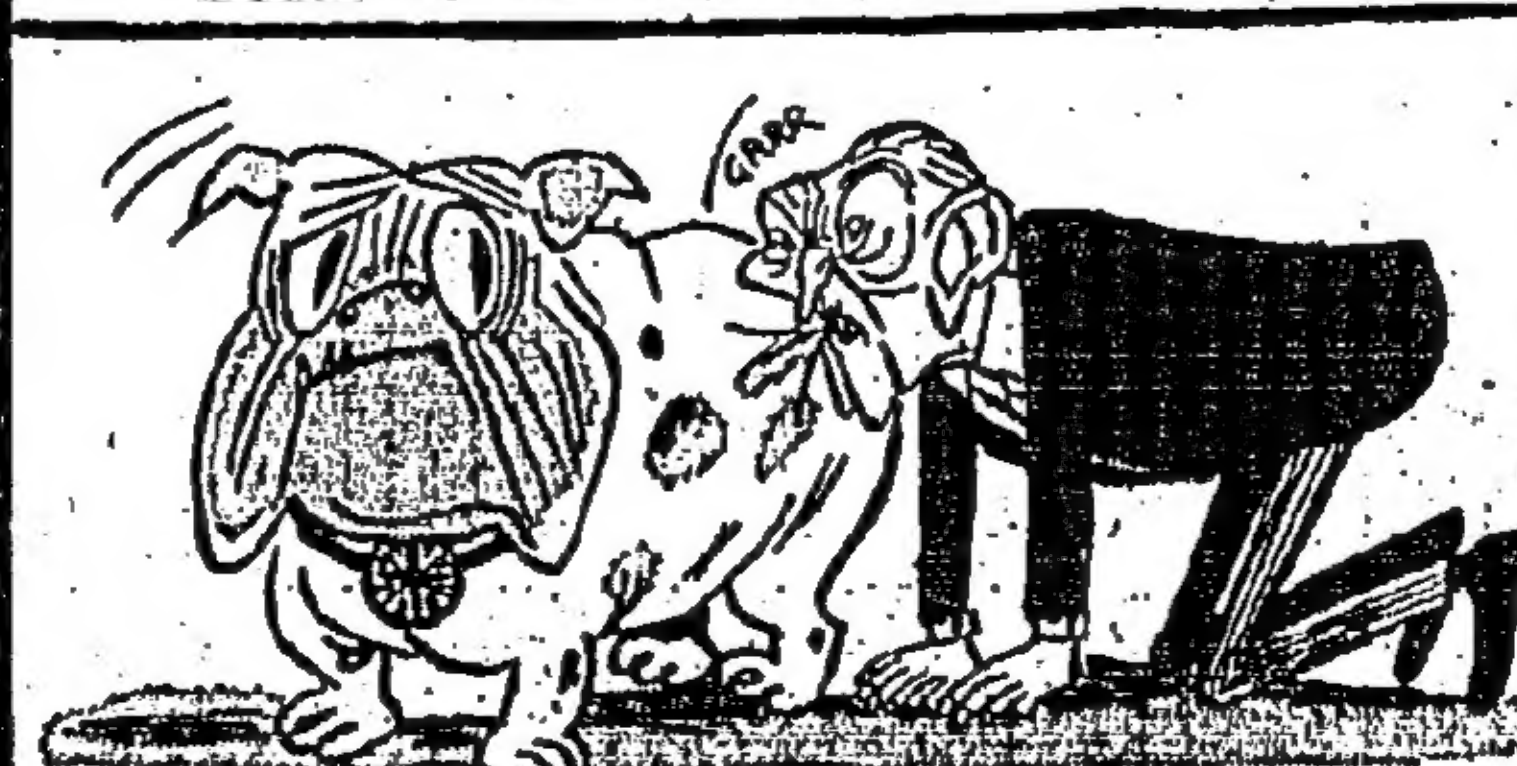

It is not working. The pity is that we have to have another crisis in Cyprus to self-force what sure should have taught.

LADY LUCK

your CHINA MAIL horoscope

MONDAY, AUGUST 24

AQUARIUS (January 21-February 19): Be careful not to let an innocent holiday flirtation develop into too serious an affair.

PISCES (February 20-March 20): A difference in temperament between you and someone closely associated with you may cause a certain amount of friction which you, however, be aware of with tact and careful handling.

ARIES (March 21-April 19): In striving for a high degree of professional skill you may have to forego some of the small pleasures in which others less ambitious can freely indulge.

TAURUS (April 20-May 20): If you are slowly but surely coming to the realization that you seem to have mistaken your vocation, there is still time to pursue the occupation which would suit you better.

GEMINI (May 21-June 21): An old friend from abroad on a short visit deserves special treatment and will be touched by your warm reception.

CANCER (June 22-July 21): A careful examination of your financial position is definitely due and if sooner you get down to it the sooner you will be able to improve it.

LEO (July 22-August 21): Keep your fingers crossed in the hope that you may

not only be recommended but actually selected for the improved position you are striving to attain.

VIRGO (August 22-September 23): Be careful not to lavish too much exaggerated praise on the second-raters there will be nothing left for the really first-rate.

LIBRA (September 23-October 23): Your refusal to listen to the plea of a certain person may be rather short-sighted.

SCORPIO (October 23-November 21): You may feel rather frustrated in that all your time is taken up in the pursuit of your daily work with no opportunity left for expansion or fresh plans.

SAGITTARIUS (November 22-December 21): You have an excellent opportunity to contribute to the moulding of a rather weak character and ought to devote some thought to it.

CAPRICORN (December 22-January 20): Since you seem to possess the secret of how to be popular, you must choose carefully from among the numerous invitations you receive.

YOUR BIRTHDAY: If this is your birthday the coming year ought to bring about a complete reconciliation with an estranged member of your family.

ONE WAY TO HEAVEN

By HENRY THODY

I HAVE just met the most astonishing nun in the Roman Catholic Church. I found her in Rome wearing red lipstick, pink varnished nails, blue-tinted hair and a very chic suit.

She also owns a fur coat, attends smart cocktail parties, and is a regular customer at Helena Rubinstein's beauty parlour.

And she spends her days—surely the Vatican's most unusual activity—running a charm school. Pope John knows all about it—and approves.

Mother Dominic cast off her severe nun's habit that she wore so long as a sister of Notre Dame by special papal decree. Her charming school turns Italian girl orphans into polished, attractive ambassadors for the Church. It began this way.

Italy has nine Catholic boys' towns and Monsignor Carroll, Abbino, who runs them, thought it was time for a girls' town. A gift of a large villa on the outskirts of Rome by Hollywood actress LINDA DARNELL made the dream possible. The monsignor's problem was what to do with the girl orphans.

Jobs With The Aristocracy

The Vatican prelate recalled he often had requests from wealthy families for children's governesses. He discussed it with an American nun, Mother Dominic, who happened to be in Rome. And a five-year course in smart, educated, bi-lingual governesses began.

These nannies will eventually find jobs with children of British aristocracy, American millionaires, Eastern potentates. As well as being guaranteed good employment, the Church

believes these girls will ensure that the children in their care will become good Catholics.

Each Girl Has A Bank Account

Girls learn history, geography, chemistry, social science, nursing, pediatrics, home economics, music, art and languages.

As in a boys' town they have their own mayor and elected officers. Each girl has a bank account and is credited with "dollars" for work she does outside her studies. She can spend them on clothes and little luxuries which are placed in a "store."

The glamour orphans—many of them look like little Italian film starlets—are chosen from orphan institutions on the basis of their physical looks, personality and brains.

Mother Dominic has Vatican permission to wear street clothes as the Holy See felt she could do her job more effectively without nun's habit.

"I have to attend many social gatherings as well as lectures and business meetings. My job is also to raise funds to expand and develop our activities."

Household Hints

FILLING

Try this sandwich filling for outdoor meals. Combine ½ pound of liver sausage, ½ pound of sliced ham, 1 tablespoon each of chopped celery and chopped sweet pickle, 2 teaspoons of onion and 1 hard-cooked egg, chopped. Mix lightly. Add 3 tablespoons of mayonnaise and mix well. Makes 4 sandwiches.

FANCY POTATO SALAD
Herbed potato salad is a one-dish meal designed to please all appetites.

Saute until tender 1½ cups of sliced fresh mushrooms in 2 tablespoons of oil or butter. Cool slightly. Combine mushrooms with ½ teaspoon of instant minced garlic, 4 tablespoons of fresh lemon juice, 2 tablespoons of instant minced onion, 1 teaspoon of salt and 1½ cups of ground black pepper. Let stand until cold.

Combine 2 cups of cooked sliced potatoes, ½ cup of shredded carrots, ½ cup of chopped celery and 2 cups of hot water. Pour mixture over this and marinate for 1 hour. Serves 4.

MMMM... WITH MARSH-MALLOW

Fresh strawberry marshmallow sauce makes a tasty topping for ice cream or cake. Combine in the top of a double boiler 10 marshmallows, cut into pieces, with ½ cup of crushed fresh strawberries and 2 tablespoons of light corn syrup. Cook over hot water, stirring until smooth and thoroughly melted. Remove from heat and stir in 1 cup of sliced fresh strawberries. Cool. Yields 1½ cups.

VODKA TONIC - FOR SKIN

Maybe the Russians should peddle this skin lotion to thaw the cold war. The Glycerine Producers' Association reports that a Soviet woman's magazine, "Rabotnitsa" (Woman Worker), offered this suggestion on skin care: "It is desirable to rub the skin once or twice a day with fortifying substances, e.g. 2 g. hydrochloric acid, 10 g. 70 g. mint water and 30 g. vodka."

FANCY THIS

Packaged cereal is so fancy these days it is desirable to have a few in the house for lunch and dinner. Make strawberry sundries by placing sliced, sweetened fresh berries, puffed rice, puffed wheat, and sweetened whipped cream in layers in parfait glasses, ending with strawberries.

Serve immediately after preparing. For 2 cups of berries, use equal amounts of each cereal and 1 cup cream, whipped.

EASY

Easy dessert fresh berries served on meringue shells. Top with a dab of whipped cream or ice cream.

PROTECT EARS

On trips to the beach with baby, don't forget to apply protective sun lotion to the infant's ears. They burn readily. Some cotton swabs borrowed from the medicine cabinet can be used to coat the tiny eardrums.

BAKE IT EASY

When the heat and humidity make cake baking a chore, try this trick with store-bought cake. Melt ½ cup of lemon chips with 1 tablespoon of butter over hot water. In a small bowl combine 1½ tablespoons of hot milk, ¼ cup of confectioner's sugar and a dash of salt. Add the melted chips gradually, blending well. Pour the still warm glaze over a cake and spread with a spatula.

CARPET CARE

Two ways to protect stair carpeting, which takes the roughest wear of any rug in the home. One is to lay the carpeting with an extra foot of length folded under against one or two risers at the top of the stairs. When the carpet on the stair edge needs a rest, shift the rug down an inch or two, folding the excess material against the lowest riser.

Do this before, not after, signs of wear appear. The second way is to install an underlay or carpet cushion, with particular attention to the edges.

OLD FOR NEW

Old-fashioned earthenware casseroles and cast-iron pans, enameled or plain, are recommended for electric range cookery of casserole dishes, stews and braised foods. Lighter weight cooking ware, such as thin enamel or aluminum pots, increases the possibility of scorching or burning.

SHAKE CORDUROY

When laundering wash and wear corduroy, shake the garment thoroughly a couple of times during the drying, and give it a light all-over brushing. This method helps restore the original velvety texture.

HOLLOWAY:

by the woman leaving after 14 years—as Governor

Lady Taylor answers questions put to her by Frank Entwisle

In a sparsely furnished room with stone walls in Holloway, N.7, I have just been talking to the plump and handsome housewife of 44 who saw Styliou Christofis and Ruth Ellis die on the gallows.

Her name is Lady Taylor—Governor of Holloway Gaol for the last 14 years. She has three children, and an ex-MP husband who recently became a life peer.

Shrewd

She has brown hair, light green eyes and a manner of kindly but shrewd authority.

When she leaves in November to become an Assistant Prison Commissioner and Inspector of Women's Prisons (a little more than her recent £2,000 a year) she will take with her the secrets of more than a decade and a half in Britain's most famous women's gaol—the gaol that was attacked by novelist Joan Henry, who alleged brutality and primitive conditions after serving a sentence there.

On that occasion Lady Taylor obeyed the rules and kept quiet. Today, with Whitehall sanction, she answered my questions. I asked: Is it true that arriving prisoners—even remand prisoners who have not been convicted—are kept five or six hours in cage-like cells before medical and property checks are carried out?

She said: "Not six. The average is about two hours. And there are good reasons usually pressure of work. Prisoners often arrive in batches. It is just the same in hospitals or shops. You know you may have to wait your turn when they are busy."

Don't you think this could be demoralising—especially for unconvicted women who have never been in prison before?

Lady Taylor: "Demoralising is too strong a term. It could be an anxious time."

Is it true that remand cells are situated over a punishment block and that unconvicted prisoners can hear women going berserk? And as a doctor, what do you think of the effect this might have?

"It is true that these cells are over the punishment block, and if there is any fuss below, the remand prisoners will hear. This is not good for anyone but on these occasions, the other prisoners behave well."

I have heard that medical services are inadequate... that a prisoner who applied to see the oculist in November had still not seen him in February... that operations are delayed... that prisoners are sometimes back at work the day after childbirth.

"Nonsense! The last point is definitely not true. The others? Any complaints like this are dealt with by the medical service."

Not available

I have heard that normal cosmetics such as talcum and deodorants are denied the prisoners.

Lady Taylor: "Talcum is allowed. Deodorants are not available here at present."

I have heard that in Holloway clothing left off becomes damp overnight.

"I would not describe Holloway as very damp. Like all old buildings it has damp spots. It is certainly not true that clothing gets damp overnight."

Is it true that girls found uncontrollable at Borstals are sent here, and that they have a bad effect on prison discipline?

"Sometimes we get such Borstal girls. But it says a lot for the women here that things seem to go on very much as usual."

Is it true that there is only one wash place and lavatory for 100 women?

—(London Express Service).

JACOBY on BRIDGE

SOUTH's two-club response is a classic example of the Stayman convention. He hopes his partner can show a four-card heart suit which he will raise. Otherwise, he will rebid to two no-trump.

West's double of two clubs is also classic. He knows that South's two-club bid is artificial and wants to tell his partner what to lead against an expected final contract in no-trump or a major suit.

North's redouble is not classic. It merely shows very good clubs and suggests that maybe West has talked when he should have kept quiet.

2-2 CARD SAYING

Q—The bidding has been:
South West North East
1 ♠ Pass 1 ♥ Pass
1 ♠ Pass 3 ♥ Pass
You, South, hold:
♠ A K 5 ♥ K 3 2 ♦ 7 6 ♣ A Q 3

What do you do now?
A—Bid five hearts. This bid invites partner to bid a slam if he can take care of one of the first two diamond leads.

TODAY'S QUESTION
Your partner bids six diamonds and you know he is showing first round control. What do you do now?

Answer tomorrow

NORTH (D) 13	
♠ K Q 9	♥ J 7 5 4 3

SOUTH	
♠ 8	♥ A 10 9 2
♦ A 10 6 3	♣ A 10 6 3
♠ 4 3	♥ 4 3
East and West vulnerable	
North East South West	
1 N.T. Pass 2 ♣ Double	
Rebid. Pass Pass Pass	
Opening lead—♠ K	

East likes nothing about the double but sees no point in getting into real trouble and anyway he hopes that South will show a suit of his own.

South's pass is a gamble but that is what bridge players like and West has no place to run.

In the actual play West opened the king of clubs and continued with the ace after South let it hold. South played dummy's nine and eventually wound up making one over-trick at the two club contract.

HOT DOGS

Murray learned about hot dogs early. His cradle was a bread-basket behind the counter at Nathan's, the best known and most frantically patronised hot dog stand at Coney Island, New York's famous playground and beach resort.

His father, a young Polish immigrant named Nathan Handwerker, opened the stand in 1916. It still does business today in the same location, one block from Coney Island's oceanfront boardwalk.

The frankfurters it sells must measure up to standards first set by Nathan, still active in the business at 66.

What constitutes a good hot dog?

"It must be all beef," Murray claimed, "and not mixed with any filler. The spicing should be neither too strong nor too bland. Add a touch of garlic, but not much."

"It must have a natural but tender casing, made of sheep's intestinal membranes. This gives you a juicy, tender product. Nobody wants to eat a

dried up piece of steak. Or a dried up hot dog."

The formula for Nathan's 22-cent hot dogs was worked out by the founder when business was so small that sausages were made on the premises.

Today, with sales running to six-million franks a year—nearly seven tons on a busy summer weekend—the manufacturing is farmed out.

At peak season hours, customers line up 10 or more deep on the street. They overflow and use fenders of parked cars for tables, washing down franks, hamburgers, seafood, French fries and deli-deliessen items with soft drinks, coffee, tea and beer.

Sometimes an impromptu side-walk show is staged by visiting celebrities, who have included Sam Levenson, actress Shelley Long and her actor-husband, Anthony Franciosa, and actors Dane Clark, Ricardo Montalban and Ralph Bellamy. Appetites run high, especially among men. Some men have eaten as many as 27 hot dogs at one session, said Murray.

HOT AND COLD

Firemen were called to the home of Donald DePamplis on a report that the kitchen was aflame. The family's spaghetti dinner had been placed on the stove in a plastic collander.

Fresh blueberry cup is an easy summer dessert. Make a sauce by boiling for 3 to 4 minutes a mixture of ¾ cup of sugar, ½ cup of water, ½ teaspoon of fresh lemon juice, ½ stick of cinnamon, 3 whole cloves and a dash of salt. Remove spices and cool. Pour over 2 cups of washed blueberries. Chill 3 to 4 hours. Serves 4.

American Indians had their own system for air cooling. Apaches, Cherokees and other tribes soaked blankets in cool mountain springs, then hung them outside teepees so that the breezes, if any, would be ice-water cool.

THE SHORT LOOK IS HIGH FASHION

CHILDREN'S CORNER

Knarf Wants a Ride

—Mr. Merlin Borrows a Broom for Him—

By MAX TRELL

"NOW I've just been thinking," said Knarf, the Shadow Boy with the Turned-About Name, as he sat down behind his sister, Handi. Handi looked up at her brother.

"What have you been thinking, Knarf?" she asked.

Wants a Ride

"I've been thinking," said Knarf, "that I'd like to go for a ride."

"A ride on what?" asked Handi.

"A ride on anything," answered Knarf.

Handi shook her head. She rose to her feet.

"You can't go for a ride on anything when you haven't got anything to go for a ride on. And anyway," she added, "I've got to sweep this room."

Started To Sweep

Handi went over to a corner where a broom was standing and started to sweep the room. "I wish I could ride on that broom," said Knarf.

At that moment, Mr. Merlin, the Magnificent Magician, came out from behind the bookcase where he lived.

"Good morning, Knarf! Good morning, Handi!" he said.

Knarf and Handi both returned Mr. Merlin's greeting. "Did I or did I not," asked Mr. Merlin, looking at Knarf, "hear you say that you wanted to take a ride?"

"Yes, I do!" Knarf exclaimed.

"Knarf even wants to ride on a broom," said Handi. She laughed as she said this.

A Good Idea

Much to Knarf's surprise, Mr. Merlin said: "That's a very good idea. I know a lady—her name is Mrs. Goose—who always rides around on a broom. I think I can borrow her broom for you, Knarf. Would you like that?"

Knarf shouted that he would like that, indeed.

"Fine!" said Mr. Merlin. "I'll see if I can borrow Mrs. Goose's

Tiny Broom

A moment or two later, somebody inside the book handed him a tiny broom.

"Here it is," said Mr. Merlin, as he handed the broom to Knarf.

The broom grew larger and larger. Knarf sat astride it as if it were a horse.

"Hold on tight to the broomstick," warned Mr. Merlin. "Don't fall off!"

The broom had risen off the ground.

Round and round the room swept Knarf. He swept past the lamp. He swept past the pictures on the wall. He swept over Handi's head.

Had To Duck

He made Mr. Merlin duck to the ground as he swept past his face.

Then Knarf swept up and down the stairs, up to the attic and down to the cellar.

Sitting on a broomstick,

Knarf swept around the room.

And finally, when Knarf's wonderful broom-ride was over and Mrs. Goose's broom was put back into the Mother Goose Book, Handi noticed a wonderful thing.

"Just look!" she cried joyfully. "The whole house is swept clean! Thank you very much, Mr. Merlin, you're a Magnificent Magician!"

"I guess I'm the most Magnificent Magician in the whole world," said Mr. Merlin, modestly.

"What else could get the Mother Goose's Broom out of the Mother Goose Book?"

And he smiled and went back behind the bookcase.

Rupert and the Outlaws—7

Rupert is relieved to know his pal Katus is not ill, and, thinking the dog ends and pulls in any direction except the right one. All at once something attracts its attention, and it jinks away on a new line so suddenly that the lead breaks, leaving only the end in Rupert's hand.

Moss Breaks His 'Hoodoo'

LEADS FROM START TO FINISH TO WIN THE PORTUGUESE GRAND PRIX

BRABHAM SKIDS OFF THE TRACK

Lisbon, Aug. 23.

British racing driver Stirling Moss broke his big race "hoodoo" by winning the Portuguese Grand Prix today in a Cooper-Climax to gain his first Formula One Grand Prix success of the season.

Driving superbly over the 3.4 miles undulating circuit with its many testing bends, Moss led from start to finish, pulling away from his rivals all the time.

He covered the 62 laps, totaling about 210 miles, in two hours 11 mins 55.41 secs, at an average speed of 153.300 m.p.h. (95.21 mph).

Fastest Lap

Moss also had the fastest lap, covering the 28th at 156.275 m.p.h. (96.96 mph) and gained nine points in the drivers' world championship, in which he now has 17½ points.

Maarten Gregory (United States) in a works Cooper, was second and Dan Gurney (United States), in an Italian Ferrari, third.

Both finished a lap behind Moss. Australian Jack Brabham had had luck in his quest for the championship, in which he leads with 27 points. He hung on grimly to Moss's tail in a works Cooper until his car skidded off the track in the 24th lap, after covering about 80 miles.

Not Serious

He was taken to hospital after the accident.

Hospital officials said that Brabham appeared to be suffering only from bruises, and that on first examination he did not appear to be injured seriously.

Brabham, 33-year-old Sydney-born driver, was leading in the world drivers' championship before today's race, one of the series for the title.

This accident occurred on the 24th lap of the 62-lap race, when Brabham was lying second to Britain's Stirling Moss. As he took a curve his car skidded and slewed off the track.

Brabham won the Monaco and British Grand Prix in the world championship series. At the start of today's event he had 27 points in the championship.

Four points more than his nearest rival, Tony Brooks, of Britain.—Reuters.

Tony Marsh Wins Austrian Grand Prix

Graz, Aug. 23. British race driver, Tony Marsh today won the international Formula Two Grand Prix motor race on the Zeltweg aerodrome circuit in Styria (Austria) at the wheel of a "Cooper-Climax".

Marsh covered the 160 kilometres (100 miles) in one hour, 9 mins 1.7 secs. Another British driver David Piper, in a "Lotus", placed second in one hour 9 mins 16.6 secs and Ernst Vogel (Austria—Porsche Spyder) placed third in one hour 9 mins 20.9 secs.—AFP.

Softball League Entry Date Extended

The Hongkong Softball Association announce that the closing date for entries in respect of the Winter League has been extended to August 25, 1959.

West Germany Take Top Honours At European Rowing Championships

Paris, Aug. 23.

West German rowers won most of the honours in the 49th men's European rowing championships which ended at Macon near here today. Maintaining a supremacy which they have held for several years, the Germans won four of the seven final events—coxed and coxswainless pairs, coxed fours and eights.

They would have won a fifth event had it not been for an unexpected rush in the coxswainless four by Switzerland, which won by a mere 0.79 of a second. Russia, the traditional rival of West Germany in the rowing championships, had to content itself with second honours. The Soviets took the skiffs and double sculls races.

The Germania Club of Düsseldorf gave West Germany its first title on the final day of the championships held on the swift running water of the River Saone.

With the wind blowing with the current, Düsseldorf's coxed fours pulled away to an early lead. Striking up to a steady 47 they took a comfortable length's advantage over Yugoslavia and Holland.

Increased Lead

Their boat running well, the Germans increased their lead to two lengths over Holland. Yugoslavia faded away and the Germans stroked home to a comfortable win. Sweden and Hungary battled for third place behind Holland. Sweden pipped Hungary at the post with Yugoslavia trailing in fifth place.

Coxswainless Fours: Switzerland (Kottmann-Streuli-Ess-Scheller). Eight: West Germany (Lent-Hopp-Bittner-Vongrodeck-F. Schenke-K. Schepke-Schroeder-Rollis).—AFP.

Easy Victory

In spite of a great effort by the Bulgarians, the Germans had an easy victory. With 43 strokes a minute the Germans took the lead at the outset. The Russians finished close behind Italy.

The Soviet Union's Vyacheslav Ivanov had his revenge over Australia's Stuart Mackenzie when he won the single sculls title.

HK Softballers Win Last Game In Formosa

The Hongkong softball squad rounded off their tour of Formosa on Saturday with a close 7-5 victory over the Taipei China Softball girls' team. This means that the Hongkong team finish their four-game series with two wins and two losses. They will be leaving Formosa by the SS "Szechuen" on Tuesday, arriving back in the Colony on Thursday.

WEEKEND LEAGUE BOWLS

Race For First Division Title Will Now Have A Close Finish

By ROBERT TAY

The Colony lawn bowls league will after all reach an exciting finish not only in the third division but also in the first division as the result of a splendid upset victory during the weekend.

Former champions Kowloon Cricket Club, who have been struggling as best as they could this season with the limited number of players at their disposal, brought off not only their best win of the season but what is also the greatest upset in the first division this season when they handed potential champions Indian Recreation Club "A" a 5-0 defeat.

What was more surprising in the Cricket Club's victory was the convincing margin which they won by in each of the three risks.

Making their win more creditable was also the fact that they fielded a makeshift team, that included two second division players, E. C. Kew and George Ladd. Both these players came through with flying colours and their brilliant performances played no small part in their club's triumph.

Special praise must also be extended to S. Ramchand, who played an exceptionally fine game in his debut—in the KCC first division team as No. 3.

Ramchand has improved tremendously since he took part in a number of competitions in England during the last two years, and it has been rather surprising that he has not been given a chance to play at No. 3 earlier on in the season.

Precarious Position

As a result of this defeat and of Kowloon Dock Club's 5-0 win over Recoelo "A" on Saturday, the Indians are now in a rather precarious position with only a lead of 3½ points over Kowloon Dock Club.

The match between the Indians and the dockmen this Saturday at Soetunpoo may probably be the deciding one. A 5-0 win for the Dock will put them in a strong position for the title, as the Indians will have to play Recoelo "A" away and the dockmen have a comparatively easier game against Recoelo "B" at home in their last games of the season.

Repeat Upset Win

In the second division, Craigengower Cricket Club scored a repeat 4-1 upset triumph over league-leading Hongkong Football Club.

But although this defeat has the effect of cutting down the Football Club's lead to 1½ points over Craigengower who have one game in hand, the Football Club are still in a strong position of winning the title.

They are expected to win their next home match against PRC "B" by a comfortable margin to clinch the title and render the result of their last match of the season against PRC "A" immaterial.

The third division games saw on Saturday Indian Recreation Club take their challenge for the title by losing to Hong-

kong Football Club by 1½ points to 3½. They are now 2½ points behind Hongkong Electric Club who still have one game in hand.

The Hongkong Football Club by virtue of this win put themselves back in the running for the race and their match against HERC next Saturday will have an important bearing on the championship race.

Sports Diary

TO-DAY

Meeting
Hongkong Chinese Football Association meeting, C.A.A.F. Building, 9 P.M.
N.K.A.S.A. Water Committee meeting, Shell Club, 5.30 p.m.

Preston And England Star TOM FINNEY Looks At The New Season And Forecasts:

IT WILL BE A TESTING TIME FOR ENGLAND—THEY'LL MISS WRIGHT

Sitting on the terraces at Deepdale, I look at the freshly-cut grass, sniff the new paint on the stands and wonder what lies ahead.

Will Wolves, the League champions, stay at the top without the driving force to Billy Wright?

Can big Mel Charles answer the prayers of 100,000 Arsenal followers?

Will the genius of Matt Busby rekindle the fire at Old Trafford? Is time finally running out for Stanley Matthews?

These are just some of the questions which will be answered in what may well prove the most vital season in post-war football.

For this is testing time for England.

Our players have returned sadly from South America. Our title of "Soccer Masters" is now just a sad memory.

Anti-Climax

And on top of this comes the shock news of Billy Wright's retirement. I've played with him for 12 years, but even to me this came as a complete surprise.

England has lost more than a centre-half. She has lost the lynch-pin of her defence. . . a captain with the ability both to steady and inspire his men.

I know he had his critics—but I was never one of them. And I suspect that many people will only realise how much he meant to England now that he has gone.

I am particularly sorry that his career ended on such a note of anti-climax. Billy, who had done so much for his club and country, surely deserved to go out on a high note.

Now it is high time for England to take stock of her position and I am sure the selection committee is doing just that.

What is the chief cause of England's footballing decline? Personally I am sure it's due to a neglect of the basic skill. In the struggle for League points, these are all too often forgotten.

Too Fast

We all tend to play a little too fast and sacrifice accuracy for speed. And yet one only has to look at youngsters like Johnny Haynes, Bobby Charlton and Jimmy Greaves to realise that we still have the talent needed to steer us back to the top.

I wonder what George Hynor feels about all this. The man who steered Sweden to the World Cup final has found British clubs singularly slow to accept his services.

He is currently with little-known Skegness Town in the Midland League and yet I hear that the Swedes have already asked him to look after them when they come to Wembley.

Here, of course, is a real chance for England to regain some of her lost prestige and for this reason I hope Sweden brings her Italian League players.

If England will miss Billy Wright, so too will Wolves who will be striving for their third successive championship. Much will depend upon Wright's successor, George Showell—a young player who will be tackling one of the toughest jobs in football.

The club, I understand, expects him to follow Billy's footsteps all the way into the England team and that's certainly a possibility. He is big and strong with plenty of natural ability.

But Wolves are likely to find the opposition stiff. Manchester United are likely to be stern challengers. I am waiting confidently for their attack—Bradley, Quilley, Violett, Charlton—to set Old Trafford alight. The only question is "When?"

If the line clicks this season, the legend of the "Busby Babes" could well live again.

Arsenal's Bid

Also trying to recapture past triumphs are Arsenal. Their buying of Mel Charles is a bid to return to the glory days when the side was built around big centre-halves like Herbie Roberts.

The Highbury fans are planning their faith on Mel and he'll need broad shoulders to carry that burden of responsibility. I cannot help remembering the fate of another Welshman, Bryn Jones.

He, too, was signed for the purpose of leading Arsenal to the heights. Potentially a brilliant player, likeable Bryn was weighed down by the advance publicity and seldom touched his true form.

Much depends upon the Arsenal followers. They mustn't expect too much, too soon. Club fortunes are not changed overnight.

It takes time and patience and, in this respect, the men who stand and watch have a vital part to play. They can make or break a player. . . or club.

Just a fourpenny bus-ride away from Highbury at White Hart Lane, Spurs too are setting out with high hopes.

Recent arrivals like goalkeeper Bill Brown, wing-half Dave Mackay and Tony Marchal—signed from the Italian League—have given Spurs an embarrassment of riches.

They have a first-team, valued at close on a quarter of a million pounds, and the problem here will be "Who to leave out?"

Will Wolves' outside-right Mickey Mill step into the international limelight?

Can Johnny Haynes steer newly promoted Fulham to fresh triumphs?

And how about Tom Finney? What lies ahead for him?

For me, too, this is a vital season. My damaged groin has stood up well to intensive summer training, but the real test will come in the hurly-burly of the League.

I never wanted fitness more. There's so much to be done. And I'd like a small part in the doing.

(All Rights Reserved)

Will the Scots beat England at Hampden and so clinch the international championship?

Can Johnny Haynes steer newly promoted Fulham to fresh triumphs?

And how about Tom Finney? What lies ahead for him?

For me, too, this is a vital season. My damaged groin has stood up well to intensive summer training, but the real test will come in the hurly-burly of the League.

SCIENCE AND ENGINEERING

New Product To Help Combat Fungus Disease

A NEW product, to be marketed shortly by a U.K. firm will combat 'grey mould' or botrytis, the principal fungus disease of glass raised lettuce. For the first time this disease can now be controlled without checking the growth of the plant.

The new product which contains a nitrate of silver derivative is the latest discovery of the firm's research department. It will be sold in the form of a yellow powder which is mixed with the soil before planting or used afterwards as a dust. The powder is completely odourless and harmless and, of course, entirely harmless to the people who will consume the lettuce.

Grey mould, or botrytis, is a common disease of glass raised lettuce. It is caused by a fungus which grows on the leaves and stems of the plant. The fungus produces a grey, fuzzy growth on the leaves and stems, which eventually kills the plant. The new product is a nitrate of silver derivative which is mixed with the soil before planting or used afterwards as a dust. It is completely odourless and harmless and, of course, entirely harmless to the people who will consume the lettuce.

The new preparation has also proved effective under glass in the control of 'damping off', a disease which is caused by a fungus which grows on the seedlings. It is a common disease of glass raised lettuce. It is caused by a fungus which grows on the seedlings. The new product is a nitrate of silver derivative which is mixed with the soil before planting or used afterwards as a dust. It is completely odourless and harmless and, of course, entirely harmless to the people who will consume the lettuce.

The product has been tested extensively by commercial growers all over Britain and in other countries overseas under widely different soil conditions and has given uniformly excellent control with all varieties of lettuce. There are good hopes that the preparation will prove to be effective in other plants and extensive trials are being carried out. ("Allison" is made by Boots Chemists, Nottingham, England).

Thermostatic Soldering Iron

A NEW thermostatic soldering iron, with accurate temperature control, has been developed from a National Research Development Corporation patent by a small Scottish engineering company. It is particularly useful for fine work, especially in the manufacture of delicate electronic components used in guided missiles.

The managing director, Mr. G. S. Meek, believed that there was an urgent need for a high quality instrument of this kind. His idea was to provide a temperature control of plus or minus 15 degrees Centigrade at a normal setting of 200-250 degrees Centigrade. Enquiries at the Patents Library, however, showed that the General Post Office already had a patent in existence covering the idea and as this was in the hands of the National Research Development Corporation for exploitation, Mr. Meek applied for a licence to manufacture.

The next step was the development of the basic idea which was to make the soldering iron expand or contract in a non-linear metal rod and an outer case operate a micro-switch by an intermediary magnifying lever movement. Trials showed that a number of factors required further investigation and experiment. Mr. Meek, who is an engineer, carried out this work personally, as a result of which he succeeded in dispensing with the expensive steel (an iron-nickel alloy with a low coefficient of expansion) originally specified. In its place he used ordinary mild steel, cutting costs by about 50 per cent.

Difficulty was experienced in obtaining a correctly wound heating element. This was overcome by winding it with a uniform light tension to avoid excessive tightening of the wire, which would cause breakage. Finally, he solved the problem of heat transference to the handle by cutting short the copper alloy expansion rod and joining it to a metal with low conductivity. This idea is now the subject of a patent application.

The company now manufactures two models of this thermostatic soldering iron—a 70 watt iron for production and repair work in radio electronics and other small work, and a 500 watt iron for general workshop use. Both models will be displayed on the D.S.E. stand at the Scottish Industries Exhibition (Glasgow, September 3-19) with other examples of science-based ideas in Scottish industry.

New Air Equipment To Be Shown

TWO new developments in aircraft equipment—an engine condition analyzer which provides visual information on engine temperature and vibration, and a crash position indicator will be exhibited at the Farnborough Air Show (September 7-13).

The engine condition analyzer continuously monitors engine temperature and vibration in flight and displays the information in a form which can be assessed at a glance. On pre-flight checks the analyzer makes engine conditions immediately apparent. It also allows fault location and checks on condition for routine maintenance to be made without external equipment or rigs. A detailed check of the temperature of any engine can be made at the turn of a switch.

The crash position indicator is a radio beacon transmitter based on the well-known Sarah search and rescue homing equipment. It also allows fault location and checks on condition for routine maintenance to be made without external equipment or rigs. A detailed check of the temperature of any engine can be made at the turn of a switch.

The indicator is constructed over a thin plate aerial and embedded in tough plastic foam to form an aerosol which becomes an integral section of the aircraft fuselage. Immediately prior to or simultaneously with crash impact, the aerosol is released, delivered a safe distance from the aircraft and automatically commences radiating radio beacon transmission. The signal is compatible with Sarah search equipment now in use, and can be received by up to 70 miles. The transmitter will operate successfully immersed in water or marsh and will float 80 per cent out of water.

This equipment ensures that in conditions of fog or low cloud, searching aircraft or ships, which at the present time may pass within yards of survivors, cannot fail to locate their position. (Ultra Electric Ltd., Western Avenue, London, W. 3.)

Tool For Metal And Wood Work

A U. K. firm which produced the lathes used by Britain's Geophysical Year Antarctic expedition has developed a new machine tool suitable for both metal and wood working.

Although it was designed originally for the amateur market, the new machine, has been proved under test to industrial standards. In the sphere of metal working it is a sturdy centre lathe with variable height of centres and with automatic sliding motion to the cross slide and full screw cutting capabilities. The lathe can be set over for taper turning.

By winding off the cross slide unit and substituting a milling table it offers the facilities of a small horizontal milling machine. The drive to the milling is taken, not by the taper in the spindle, but by a special arrangement of gears in the nose of the spindle, thus avoiding the danger of damage to the taper bore. By mounting an angle plate on the milling table, surfacing, boring and end milling can be carried out in single setting. It may thus be used for machining simple press tools. Keywaying of shafts is also a simple matter. For the metal worker, boring is also a machine process for which the machine is suited.

For the wood worker a saw bench is available with tilting table and a special stub arbor for carrying the saws. With a suitable cutter mounted on the spindle and employing the rise and fall feature of the headstock, combing, dovetailing, grooving and spline moulding can be carried out. A sanding disc can also be mounted on the spindle. (Murd Development Ltd., Stockdale, Elybury, Bucks.)

Weekly Survey Of American Economy

Production Slows Down Due To Steel Strike

New York, Aug. 23.

Further industrial losses, slowing down of production and resulting Washington concern marked the sixth week of the steel strike.

The situation was compounded by the expansion last week of the copper strike to the point where it affects three-quarters of U. S. production of that metal. The first official statistics on the effect of the steel strike at least during the first two weeks of it are available now. They are not staggering but will cause concern to anybody who cares to translate them into a six-week period. And even in its sixth week, the labour dispute failed to reach a stage where any settlement would appear possible soon.

ONLY WAY

Consequently, among leaders of industry at least, talk was being heard that the only way out would be for the government to exercise its right and order an 80-day cooling-off period during which production would be resumed while negotiations go on.

But all the government did so far was to publish this week a wealth of background information on the strike in a strictly impartial way, without any recommendations. The public was left to draw its own conclusions and they were pretty hard to draw.

What the government did was to show that the steelworkers are the best paid in any industry, that the steel companies have had the biggest profits over a period of years and that as a result the price of steel has steadily been climbing up more than that of any other basic product. Under these circumstances the public was likely to ask what the strike is all about and again get no satisfactory answer.

To an outside observer it would seem that the strike was some sort of an expensive game management and labour had to play every three years or so. But both sides would deny this vigorously, the management claiming that more was at stake than money, that what is in-

involved is the increasing right of labour to demand that companies should be run; labour maintaining that precisely because profits were so large, management had a duty to share more of them with the public. In the way both sides are present-day issues as involving lofty principles rather than just questions of material gain.

The strike now passed the 34-day length of the 1959 walkout which was the second largest in post-war history. The longest steel strike in the U. S. was in 1952 and lasted two months. The Iron Age Magazine said the only way out of the impasse appears to be the invoking by the President of the 80-day cooling off provision of the Taft-Hartley Act.

That is the view of the industry. Labour counters that such a step would not help settlement, on the contrary, it would delay it. All available official statistics and private industry reports meanwhile spoke of a growing slow-down tendency in the economy. This was the picture:

STEEL OUTPUT

Steel production last week amounted to an estimated 337,000 tons or 11.9 per cent of capacity. Mill output last week totalled 335,000 tons or 11.8 per cent of capacity. Last month's operations were at 12.9 per cent of capacity, yielding 365,000 tons.

The steel strike was responsible for a one per cent decline in industrial production last week. The "best-planned" half of July was affected by the walkout. It was the first drop in 15 months. The industrial production index had climbed steadily every month since April 1958. The Federal Reserve Board reported industrial production in July at 153 per cent of the 1947-49 level, off two points—or one per cent—from the June level of 155. At this rate, even if further layoffs do not slow down production further, the industrial index in August would drop a further four points.

U. S. copper production was expected to be slashed by three-fourths towards the end of this past week as a result of last week's walkout by the mine, mill and smelter workers union against Kennecott and Magna. A strike against Anaconda, Phelps Dodge, copper stocks, however, are estimated as being sufficient for two to four month period. The total of copper strikers is over 10,000.

An eight-month strike in payrolls was halted by the steel strike. Commerce Department statistics for July showed the total income of individual Americans inched to a new record—an annual rate of \$384,100,000,000 and a gain of \$300,000,000 from the June level. But wage and salary payments slumped \$300,000,000 on the average to a rate of \$261,200,000,000. Payrolls in manufacturing industries alone were down an even \$1 billion but rises in other business halved the loss on the average for the month.

The steel inventory picture is still optimistic for most major steel users and existing supplies are considered still adequate for another six weeks. The breakdown, as reported by steel magazines, is: 26 million at the end of six weeks as steel users have been dipping into the stocks at a rate of one million tons a week. Actually some 1,500,000 tons is being used every week and the above inventory level is being accounted for in this way: 250,000 tons from mills that are still operating, 150,000 tons from steel warehouses and 100,000 tons from imports. The magazine said that 14,000,000 tons in steel inventories would mean minimum working requirements. At the above rate this level will be reached in another six weeks.

The use of 100,000 tons of foreign steel every week is something new in the U. S. economy. It is the result of something that has been building up long before the current strike. Government statistics for the second quarter of this year show steel imports exceeded exports for the first time since World War II. Imports are now running at an annual rate of \$550 million or four million tons in 1958 and 350,000 tons before the war.

As for the other sectors of the U. S. economy, such as sales and services of all kinds, new highs were being recorded despite the steel strike. Retail sales, for example, set July record of \$18.2 billion or 8.1 per cent above July 1958. Department sales in August are running nine per cent ahead of August, 1958, which was a record breaker. Auto sales were continuing at a fast clip in August.—UPI.

During the 1959 steel strike the index dropped five points from 141 to 136. Mineral production, such as iron ore and coal, dropped five per cent in July as a result of the strike. The drop was even bigger in August. The National Coal Association estimated total coal output for the week ended Aug. 8 at 6,590,000 tons, down from 7,285,000 tons in the previous week and 13.5 per cent below the 7,923,000 tons produced in the corresponding week of last year when the industry was just beginning to climb out of its recession woes.

Railroad earnings currently are off at a weekly average of 160,000. This is the main source of the layoffs on the fringe of the strike which government statistics for July put officially at 100,000. Additional layoffs have occurred in August.

The latest were in Milwaukee at A. O. Smith Corp., producers of Line Pipe and Oil Well Casings, where 300 had been laid off and 40 more are leaving work next week. There are dozens such small-scale layoffs throughout the country especially in specialty steel plants where inventories are beginning to dwindle. The "best-planned" steel strike in history" claim applies to large basic-type steel product manufacturers. Spot shortages have already developed for several specialty products and as a result foreign steel prices—normally \$30 to \$40 a ton below domestic mill prices—are now equal to or above the U. S. price. Mid-September is now put forward as the date when steel shortages will begin to hurt almost everywhere.

COPPER STRIKE U. S. copper production was expected to be slashed by three-fourths towards the end of this past week as a result of last week's walkout by the mine, mill and smelter workers union against Kennecott and Magna. A strike against Anaconda, Phelps Dodge, copper stocks, however, are estimated as being sufficient for two to four month period. The total of copper strikers is over 10,000.

Exchange Rates

Business was done in the local monetary exchange market this morning at the following rates:

U.S. dollars (per \$1)	5.72
Sterling notes (per £1)	15.91
Australian notes (per £1)	3.59
Indonesian rupiah (per 100)	26.55
Siamese baht (per 100)	26.55
Singapore (Straits)	1.53

U.S. imports from the Soviet Union during the first quarter of 1959 also reflected an increase in trade, totalling \$9,615,000. Most of it was for benzene, chrome ore, platinum and furs.

This compared with \$17,551,000 for all of 1958. Imports from all of eastern Europe for the first three months totalled \$2,100,000.

At the same time, Mueller said the value of export licences issued to U.S. firms for shipments to Communist bloc nations rose by \$600,000 during the second quarter of the year to reach a total of \$7,247,000.

Second quarter export licences issued \$3,300,000 in goods destined for the Soviet Union with almost a third involving paper pulp machinery. Other products to be shipped to Russia are butyl acetate, molasses, picture film, synthetic fibres and conveying equipment.

COMMODITIES Commodities licenses for exports to other eastern European countries included tobacco valued at \$818,730 to Czechoslovakia and East Germany, corn \$650,240 to Bulgaria; crude sulphur \$515,000 and dimethyl terephthalate, \$204,000 to Czechoslovakia and soybean oil, \$463,050 to Rumania.

Most of the actual shipment to non-Soviet nations in the Communist bloc were agricultural products destined for Poland.

Despite the increase in East-West trade, exports to eastern Europe for the first quarter amounted to less than one half of per cent of total U.S. exports. Imports from the Soviet bloc came to sixteenth of one per cent of total imports.

The United States trades only with Communist nations in Europe. It carries on none with Red China or North Korea.

Second quarter export licences issued \$3,300,000 in goods destined for the Soviet Union with almost a third involving paper pulp machinery. Other products to be shipped to Russia are butyl acetate, molasses, picture film, synthetic fibres and conveying equipment.

UNCERTAINTY PREVAILS ON N.Y. MARKET

New York, Aug. 23.

The stock market took a beating for the third successful week.

The market enjoyed only one good session this week—on Thursday—but this was not nearly enough to offset losses suffered earlier in the week. Caution was the by-word in Wall Street. The market is wrestling with three big uncertainties and investors appear reluctant to commit themselves until they are clarified. These question marks include the coming Khrushchev visit, the lengthening steel strike and the possible effects of the government's tight money policy on the economy.

Investors are playing the "waiting game," says one broker. He pointed out the tired bull market is going to need a new stimulus if it is to restore its advance with any conviction. Most analysts believe settlement of the steel strike

will provide just such a stimulus. Individual corporate developments played important roles in the price action of many issues. United Fruit omitted its dividend and lost 5 1/2 points on the week. Southern Pacific raised its dividend and proposed a stock split, sending that stock up 5 1/2 on the week.

Automatic Cateen rose 4 1/2 on a stock split. The steel score gained 1 to 2 points the past week in Allegheny-Ludlum, Youngstown, Bethlehem, U.S. Steel and National Steel. Aluminum issues were strong but copper issues were generally weak. Cals and tyres suffered some fairly sharp losses. So did the

Tour Of Local Industries By Mr C.B. Burgess

The Officer Administering the Government, Mr Claude Burgess, visited three well-known factories in Kowloon this morning and saw the manufacture of vacuum flasks, torchlights and shirts.

Mr Burgess was accompanied by Mr D. C. Barry, Acting Director of Commerce and Industry. The first factory visited was the Wei Yit Vacuum Flask Manufacturing at Canal House, Palm Street, in Tai Kok Tsui. On arrival, the official party were met by Mr W. E. Mannon, Senior Trade Officer of Commerce and Industry Department, Mr L. Hanblidge, Acting Chief Inspector of the Labour Department, and Mr Leung Tsoo-hing, General Manager and Mr P. S. Koo, Manager of the factory.

Castle Peak Road, where a popular brand of Hongkong shirt is made by about 300 workers.

The capacity of this factory is about 7,000 dozen shirts a month.

Those who met the official party on arrival included Mr Chan Shun, Proprietor, and Mr T. H. Ma, Assistant Manager.

COMPENSATION ORDER

The Tenancy Tribunal today recommended that an exemption order be granted on an application by the Lap Shing Land Investment Co. to replace 42 and 42A Hollywood Road with a modern eight-storey building.

The tribunal also recommended that compensation totalling \$115,950 be paid to tenants—the biggest single amount being \$42,500 to the Kwai Yue Tea house on the ground floor of the 40-year-old building to be demolished.

TOWN FOR 200,000 AT WONG TAI SIN

By A CHINA MAIL REPORTER

Wong Tai Sin is taking shape as a town of 200,000.

The Government has earmarked \$40 million for 80 blocks of seven-storey buildings at the new resettlement area.

Of the 24 blocks in the first batch, 19 have been completed. The remaining five are to be ready for occupation by the end of this year.

Covering 400,000 square feet, the biggest resettlement area in the Colony will have its own modern market, police station, schools, public health clinic, nurseries, children's ground, and even a cinema.

There will be also bus services along the four trunk roads on the borders of the area.

Ship Here On Maiden Voyage

The new Momiisan Maru of the Mitsui Line arrived in Hongkong this afternoon.

The Japanese freighter on a maiden voyage is not carrying any cargo.

She will leave for New York tomorrow afternoon.

AGO

WEARING a smart gown of printed crepe mouseline in brown and white, trimmed with eire satin, Miss Ann Hobbs was married yesterday afternoon at St John's Cathedral to Mr Douglas James Smyth Crozier.

Duties of best man were undertaken by Mr J. C. M. Grenham. The bridegroom is a teacher at King's College.

★ ★ ★
Mountain Lodge lost its serenity on Saturday when for an afternoon the Scouts and Girl Guides, Cubs and Brownies, from all parts of the Colony over-ran the lawns on the special invitation of the Governor, Chief Scout of the Colony, and Lady Peel.

The day was the annual visit to the Governor's residence and was given an added significance by the farewell ceremony to the Colony's Commissioner, the Rev. G. T. Waldegrave, who leaves on Tuesday on retirement.

★ ★ ★
More than 20 people in a Cheung Chau restaurant were taken ill when the cook prepared meals with wood oil — used for painting — instead of peanut oil. All quickly recovered.

★ ★ ★
FROM the SCM Post's 25 Years Ago column: "A field for Hongkong industrial enterprise suggests itself in the fact that great quantities of fire bricks from Liverpool have been discharged at Bangkok by the ss Dagmar.

"Enquiries as to why bricks should be carried all the way from England to Bangkok were met by one of the officers remarking: 'Well I cannot say, but a great portion of our cargo is for the King, he is forever constructing and beautifying. The bricks may be for him.'

The type of brick, we are informed, is good and worth carrying a long way but why they should be imported all the way from Europe we fail to understand, when a very good quality of brick is made in Hongkong, and Amoy brick especially is famous.

"We are sure that the red bricks with which public buildings of Hongkong are being constructed would be hard to beat for quality and durability. "The Green Island Cement Company's agents in Bangkok is the most prominent firm in the place. Winslow and Company, and we hope to hear of some of the big orders from Bangkok in the brick and cement lines coming to Hongkong."
